

Project Title

Intimate Partner Violence (IPV) in Uganda: An Implementation-Ready Field Phase Model

Author

N.K. Black, MPH | Project Manager

Affiliation

Milken Institute School of Public Health, The George Washington University

Duration

8 Weeks (Simulated Field Phase)

Objective

Develop a field-ready research and project management framework to assess IPV prevalence and correlates among Ugandan women aged 15–49, following WHO ethical and operational standards.

Key Deliverables

- Research Protocol and Sampling Framework
- WHO-Style Gantt Chart and Field Schedule
- GBV Safety and Ethics Integration Plan
- Data Quality Monitoring Framework
- Dissemination and Post-Field Analysis Plan

Outcome

Implementation-ready model recognized for methodological rigor and ethical compliance, bridging academic research with real-world project execution.
